Summary

Experienced software engineer with a background in planning, developing, scaling, architecting, securing, and maintaining large-scale web applications, microservices, and APIs in critical environments, serving millions of users daily, for the financial, banking, education and security sectors. I consider myself passionate about solving problems and helping people. I love technology and all the possibilities it offers. If there's a problem, there's a way to solve it with technology. My main focus is delivering and adding value to the company and team that I'm working on with all my professional experiences.

Experience

Stone <i>Software engineer</i>	Rio de Janeiro, Brazil Jan 2024 - Present
<ul style="list-style-type: none">• I created several security automations to protect the company's intellectual property like the codes on the Github and the client's data.• I created new products for engineering teams including security services to facilitate the analyzing, granting and revoking access to company assets.• I made code refactorings and performance improvements in several web applications using good practices such as Clean Code, Clean Architecture, Design Patterns and SOLID.• Context: Stone is one of the biggest payments and finance companies in Brazil and Latin America. It offers payments and banking services to other big companies, so there are millions of users using its systems every day.	
Pagar.me <i>Software engineer</i>	Rio de Janeiro, Brazil Sep 2022 - Dec 2023
<ul style="list-style-type: none">• I created a new reading layer architecture that increased the performance by 30% and brought more reliability in storage data.• I broke a huge monolith into microservices separated by context, bringing more reliability and ease of maintenance.• I made code refactorings and performance improvements in several legacy applications using good practices such as Clean Code, Clean Architecture, Design Patterns and SOLID.• Context: Pagar.me is one of the biggest payments and finance companies in Brazil. I was responsible for the entire reading layer, for attacking technical debts and making performance improvements in several of the company's applications and services, and working horizontally with the company's other teams.	
Mais Retorno <i>Fullstack software engineer</i>	São Paulo, Brazil Jan 2022 - Aug 2022
<ul style="list-style-type: none">• I built new complex tools for the finance market such as the assets and funds comparator, income simulator, fund tracker, fund and stock sheets, government bonds and direct treasury.• I created a complete recurring subscription system for members have access to private finance tools and advantages.• I made code refactoring and performance improvements in several applications and services using good practices such as Clean Code, Clean Architecture, Design Patterns and SOLID.• Context: Mais Retorno is a financial market and education company. It offers many tools for investors. I was responsible for planning, developing and improving new tools and products for the financial market, for fixing bugs and for helping my coworkers.	

Mais Retorno
