Geziel Elyon

Frontend | Backend | Fullstack

Jaboatão Dos Guararapes, Pernambuco, Brazil.

About me

I'm passionate about programming and creating products and services that have value and solve some type of problem in society. I am always looking for new challenges that make me evolve as a person and professional. I hope to find people who, like me, have the desire to build great things.

Experiences

Stone - Fullstack Developer

January 2024 - Present / Rio de Janeiro, Brazil.

Today I'm part of the platform team called CodeFlow. We are responsible for creating products and services for the engineering teams, for analyzing and granting access to the company's assets, and for creating security solutions for the company.

Pagar.me - Backend Developer

September 2022 - December 2023 / Rio de Janeiro, Brazil.

I was part of the Atlas team and we were responsible for the entire reading layer, for attacking technical debts and for making performance improvements across all systems, working horizontally with the other teams in the company.

Mais Retorno - Fullstack Developer

June 2021 - August 2022 / São Paulo, Brazil.

I actively participated in the frontend (Site) and backend (APIs), creating new features, making performance improvements, refactoring the code with good practices, improving SEO on the pages, and creating new tools such as the asset comparator, income simulator, user signatures, share sheets, government bonds and direct treasury.

Technologies

Javascript | Typescript | NodeJS | NestJS | Adonis | Apollo GraphQL | HTML | CSS | React
